**who
we are**

We understand the importance of reliable telecoms and data connectivity solutions for businesses. At DB Comms, our team of experts are dedicated to providing the best possible service to our customers, taking the time to truly understand your business needs in order to propose, install and manage the solution that is the perfect fit for your requirements.

In today's fast-paced business world, a dependable and high-speed internet connection is essential for success.

Slow and unreliable internet can hinder productivity, reduce efficiency, and negatively impact the bottom line. As a small business owner, you need an internet solution that can keep up with your demands and support the growth of your business.

FTTP (Fibre to the Premises) on Cityfibre Network: A Game Changer for Small Businesses FTTP on Cityfibre network, in partnership with DB Comms, is a game-changer for small businesses. This innovative solution offers lightning-fast and reliable internet speeds that are equal and consistent for both uploading and downloading. With four synchronous speeds to choose from – 160MB, 300MB, 600MB, and 900MB - you can pick the right speed for your specific needs. Whether you're conducting video conferences, transferring large files, or simply browsing the web, FTTP on Cityfibre network ensures a seamless and uninterrupted experience.

The benefits of FTTP for small businesses

1

Lightning-Fast Internet Speeds: With FTTP on Cityfibre network, you can say goodbye to slow and unreliable internet. With equal and consistent speeds for both uploading and downloading, you can enjoy a seamless online experience that supports your business needs.

2

Security and Stability: Each FTTP connection comes with a static public IP address, offering a more secure and stable connection for your business. This eliminates the risk of cyber threats and ensures that your sensitive business data is protected.

3

Prompt Repair of Network Faults: With a same-day Service Level Agreement (SLA) for repairing any network faults, you can have peace of mind knowing that any issues will be resolved promptly. This minimizes downtime and ensures that your business stays connected.

4

Support for Business Growth: FTTP on Cityfibre network is designed to support the growth of your business. With lightning-fast internet speeds, you can take advantage of new opportunities, expand your reach, and increase your productivity.

FTTP on Cityfibre network, in partnership with DB Comms, is the ideal solution for small businesses that demand a fast and reliable internet connection.

With equal and consistent speeds for both uploading and downloading, a static public IP address, and prompt repair of network faults, FTTP on Cityfibre network is the perfect choice for businesses that want to stay connected and stay ahead of the competition.

Upgrade to FTTP on Cityfibre network today and experience the power of lightning-fast internet.
